For use with Chamberlain 315 MHz or 390 MHz garage door openers manufactured after January 1, 1993. The garage door opener activates when the 4-digit Personal Identification Number (PIN) and ENTER button are pressed on the Keyless Entry.

Install the battery and program the Keyless Entry prior to installation. Make sure the garage door opener has a working light bulb because it is a programming indicator.

---

### PREPARE

Locate the Learn button on the garage door opener. **NOTE:** Your garage door opener may look different.

### PROGRAM INITIAL PIN

1. Press and hold the * and # buttons until the lights on the keypad stop blinking.
2. Enter a 4-digit personal identification number (PIN) of your choice: 
   
   ?  ?  ?  ?  

   Then press the # button.

3. Press and release the Enter button the number of times that corresponds with the garage door opener type:

<table>
<thead>
<tr>
<th># of Presses</th>
<th>Garage Door Opener Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Security+ 2.0® (Yellow Learn Button)</td>
</tr>
<tr>
<td>2</td>
<td>315 MHz Security+® (Purple Learn Button)</td>
</tr>
<tr>
<td>3</td>
<td>390 MHz Security+® (Red/Orange Learn Button)</td>
</tr>
<tr>
<td>4</td>
<td>390 MHz Billion Code (Green Learn Button)</td>
</tr>
</tbody>
</table>

4. To exit programming mode, press the 0 button.

5. Press and release the Learn button on the garage door opener.

6. Enter the 4-digit personal identification number (PIN) programmed in step 2 then press and release the Enter button until the garage door opener lights flash or two clicks are heard.

7. To test, press the PIN, then press the ENTER button. The garage door opener will activate.

---

### CHANGE AN EXISTING PIN*

1. Press the programmed PIN that you want to change.

2. Press and hold the # button until...

   ...the light bulb blinks twice.

3. Enter the new 4-digit PIN of your choice, then press the ENTER button.

4. To test, press the new PIN, then the ENTER button. The garage door opener will activate.

---

* For garage door openers that have a green Learn button or an external receiver repeat “Program Initial PIN” to change the existing PIN.
PROGRAM A TEMPORARY PIN

NOTE: This feature is not available on garage door openers that have a green Learn button or an external receiver.

A temporary 4-digit PIN can be programmed to allow access to visitors. Each programmed PIN can program one temporary PIN. The temporary PIN can be set for a number of hours or a number of door openings. The temporary PIN cannot be the same as any previously programmed PIN.

1. Press any programmed PIN, then press and hold the * button until...

2. Enter the temporary 4-digit PIN of your choice, then press the ENTER button.

3. Press the number of hours the temporary PIN will work (up to 255). Then press the * button.

To test, press the temporary PIN, then press the ENTER button. The garage door opener will activate. If the temporary PIN was set for a number of openings, the test will use up one opening.

To clear the temporary PIN, repeat steps 1-3 above, setting the number of hours or openings to 0 in step 3.

INSTALLATION

1. Select a location to mount the Keyless Entry at a minimum height of 5 feet (1.5 m) out of the reach of children.
2. Remove battery cover and battery.
3. Mark the top mounting hole and drill 1/8 inch (3.2 mm) pilot hole.
4. Install the top screw, allowing 1/8 inch (3.2 mm) to protrude above the surface. Position the Keyless Entry over the top screw.
5. Mark the bottom hole and drill 1/8 inch (3.2 mm) pilot hole. Install the bottom screw. Do not overtighten to avoid cracking the plastic housing.
6. Reinstall battery and replace cover.

OPERATION

The garage door opener activates when the PIN and ENTER button are pressed. The keypad will blink for 15 seconds, during that time the ENTER button can be used to stop, start or reverse the door.

If the wrong number is accidentally pressed, press the correct PIN then the ENTER button. The Keyless Entry will transmit only the last four digits that were pressed before the ENTER button.

ONE BUTTON CLOSE: The Keyless Entry has a feature that allows the door to be closed using the ENTER button instead of a PIN.

NOTE: This feature is not available on garage door openers manufactured prior to 2006 or an external receiver.

To deactivate the one button close feature:

1. Press and hold the 1 and 9 buttons for 10 seconds.
2. The keypad will blink four times when the one button close feature is deactivated.

To activate the one button close feature:

1. Press and hold the 1 and 9 buttons for 10 seconds.
2. The keypad will blink twice when the one button close feature is activated.

BATTERY

WARNING

To prevent possible SERIOUS INJURY or DEATH:
• NEVER allow small children near batteries.
• If battery is swallowed, immediately notify doctor.

Replace the battery when the keypad becomes dim or does not light after a button is pressed.
Dispose of old battery properly.

NOTE: This feature is not available on garage door openers that have a green Learn button or an external receiver.

A temporary 4-digit PIN can be programmed to allow access to visitors. Each programmed PIN can program one temporary PIN. The temporary PIN can be set for a number of hours or a number of door openings. The temporary PIN cannot be the same as any previously programmed PIN.
